

We thank you for your time spent taking this survey.
Your response has been recorded.

How do Cornell Notes differ from your current note-taking strategy?

By using Cornell note taking steps, we able to do create real or virtual devices. Eg. If want to create quantum computer or chip, we have understand all property. then, mathematically solve . if take notes like cornell notes, is easy to understand. My old way of note taking. writing full pages, no proper point, when, I again try to review and recall, It take 30 times, what, I written , since I missed Review & Recall part, some time Handwriting issue. lot of information missed. so, I rewrite from book again. so my time spent of writing notes again.

How is the Cornell Notes note-taking strategy similar to your note-taking?

My note taking is not similar to Cornell notes, I sometime write in spreadSheet, sometime paper, sometime doc, based on my task , I switch multiple times. since the Education system I studied not focused on one field, I studied electronic and communication engineering , but i worked as software dev. Here work is difficult. ? not able to do work, on what field, I learned. Multiple field, make multiple confusion, proper planning takes more time.

Cornell students say: "After class, I'm able to easily review my lecture notes by asking the questions from the cue column and repeating the information from the notes column back to myself."
